CONSTRUCTION UPDATE ON THE VETERANS MEMORIAL PARK

Construction has started on the Memorial Park. The flagpole base has been poured. As soon as the flagpoles arrive we erect them and fly the flags.

Three concrete forms will be built next week to display the approximate 175 bricks that have been sold.

A granite monument is being planned to honor and engrave the names of all Veterans who were killed in action while serving their country. There are 15 names to go on this monument. The monument will cost about \$16,000.00. The committee is hoping we can raise this much money by January 1, 2008 so we can order the granite and it can be installed by Memorial Day 2008.

We have many plans for the park, such as statues, lighting, sprinkler system, landscaping, military hardware, granite benches, entrances sign, concrete parking, and sidewalks. All this will be done as funds become available.
